

# FlexRx Standard Step Therapy Drug List

## How the program works

You will need to try a drug in the alternative drug column before getting a drug that is subject to step therapy. If your physician feels that an alternative drug is not right for you, your physician must submit a step-therapy override request.

## How to use the drug list

Generic drugs are listed in lowercase (e.g., bupropion).

Brand drugs are capitalized (e.g., APLENZIN).

Category Name	Drugs Subject to Step Therapy • (P) = Preferred • (NP) = Non-preferred	Date Drug Subject to Step Therapy	Alternative Drugs on the FlexRx Formulary
Antidepressants -- Used to treat depression	APLENZIN (NP)	1/1/2010	bupropion
